

Customer Order Form

Thank you for your interest in our company, which was established as CDS Kiva in 1999. We are a small, family owned and operated American made ceramic light manufacturing company. For an affordable price, we provide a very unique product that can be made to your specific requirements. Our lights are formed from a slip cast mold process, which allows us to apply different design cuts and special applications such as copper metal banding. We finish with high quality exterior grade paints in solid colors or hand painted multi-finish and metallic color combination. We are available to personally guide you through the design process choices from start to finish.
